

February 11, 1952

Regular Meeting.

Meeting today was with Mr. Alvey, Mr. Sterling and Mr. Tilp about the windows being installed in the new Health Center. The Board called Mr. Tilp's attention to Addenda 4, in the specifications and Mr. Tilp replied that the windows being installed were called for when the Board selected Alternate Bid #2. He further explained that the steel frames called for were of a very inferior grade metal and while the windows being installed were of wood, they were specially treated and would outlast a weak steel frame. He explained that he would be glad to have any three architects from Washington and Baltimore examine the windows and give their opinion on them and he was sure they would agree with him that the wood frames were of excellent quality and would outwear the metal frames. Mr. Tilp said that the metal windows in Tech. School were of heavy aluminum and they were very expensive and also could not now be obtained.

Mr. Alvey and Mr. Sterling appeared satisfied with Mr. Tilp's explanation.

A Public Meeting had been called for Feb 12, 1952 but since it was a legal holiday it would be held in March.

No business being under consideration, they adjourned at 1 p.m.
