

April 16, 1957

The Commissioners and their attorney met early this morning to have a conference with Mr. E.C. Duncan, District Engr. SRC and Mr. MC Thompson, Jr., Res. Engr, SRC relative to the County accepting the roads here for construction-reconstruction, maintenance as per their request of March 30-1957. Mr. Duncan explained that all SRC employees are under Employee's Retirement System which would be rather expensive for the County if they take over the above work. A lengthy discussion followed as the same Retirement system had been proposed for the employees of the County now not included in this system. It was decided that the roads remain under the SRC supervision until later. A letter was addressed to the SRC attention of Mr. Bonnell to this effect and copies sent to Mr. Thompson and Mr. Duncan.

3 Plats for the Road fronting on the Welfare Bldg have been received from OR Guyther, but DEED has not as yet been recorded.

In the afternoon the Board of Education met with the Commissioners to consider raise in pay for teachers as well as additional school buildings. A table showing the increased pupil personnel was given and the Commissioners explained that they are heartily in accord with both an increase for the teachers and additional schools if they can handle the financial end of the problems. Miss Dent was asked to present a breakdown showing the least possible number of class rooms and teachers they can use. Meeting arranged for May 7, at 3 pm for the Bd. of Educa. and the Commissioners.

Board adjourned at 5 pm

approved

president.
