

August 1, 1961

All officials were present at today's meeting which began with a visit from Francis Bodine of Tudor Hall sub-division, regarding the noise made by the air conditioner which disturbs his family. After a lengthy discussion, Commissioners requested Barnard Smith to come in at 2 p.m. Mr. Bodine returned for this meeting. Mr. Smith informed the Board that nothing can be done to lessen noise made by the fan, due to its enormous size and the volume of air it withdraws and to cover the fan in any way would defeat its purpose. He felt it would cost no more to cut the fan off at 9 p.m. and to start it at 8 a.m. daily. There is some feeling among the employees of the Court House, and the attorneys who also work here, that to cut the fan off at night during extremely hot weather and then start it at 8 a.m. the building would not be comfortable for working in the early hours, and fan should be kept running. Mr. Smith agreed to make a survey of the temperature of the building for a week, with fan stopped at 9 pm and started at 8 a.m., and he will advise the Commissioners of the results.

Carroll Morgan, of Smith's Inc., was requested to ^{study} air-conditioning the 2nd floor of the County Office Bldg. He made a survey as to how many window units would be required, since he felt it would cost less to use them than any other system, but was not sure the present electric system would carry the extra heavy duty thus required. Commissioners asked Mr. Morgan to come in and informed him they felt the regular air conditioning system would be cheaper to operate than the window units, but nothing can be done this year. They will contact him later and plan something for 1962.

Atty. Jos. Weiner with Jos. Dobry and a group residing on Horse Head Rd came to ask when that road would be black topped. It was gravelled in April 1960 and nothing done since then, tho repeated requests have been made as to when it would be completed. After a telephone conversation between Commissioner Hodges and Mr. Thompson, SRC, they were assured the road would be ready for use by the school busses in Sept. SRC is working on the road getting it ready for blacktopping. Letter was sent to Mr. Thompson, SRC, requesting that he complete the necessary data work in order that the road may be surface treated.

Black Topped

States Atty. Jos. Mattingly reported concerning the extradition of Mr. Hutchings who deserted his wife and forged her name to a check, and is now in Fla. Mr. Mattingly was asked to keep in touch with the Sheriff and when plans are made to bring Hutchings here to advise the Commissioners in order that they may advance funds for mileage to Fla.

Jr. Raley, informed the Commissioners that Sherron Dr. Town Creek, 8th Dist 7th sec. part 2 of Town Creek Farm is ready to be accepted for maintenance. CBG Plat Book 4, folio 25

Letter to be sent to Oliver R. Guyther, advising him the Commissioners grant one month to Sept 1, for the completion of the Boss Bailey Rd. Springfield sub-div according to SRC specifications, so it can be accepted into the County Roads System for maintenance. Grass must be removed from shoulders, road must be shaped up; 4 copies of the plat of road are to be furnished the SRC, and within 24 hours ^{after} road has been surface treated Jr. Raley must be notified so the road can be properly inspected.

Letter to be sent John E. Capps, Hollywood, regarding roads
from Argyle Court to end of Barringer Drive
All of Linden Lane, off Town Creek Dr. to Town Creek Manor sec.

Oak Court which runs off Barringer Dr- all must be surface treated and Jr. ^{before} Raley advised within 24 hours after treatment has been put on roads in order that they may be properly inspected. 4 copies of plats of each of these roads must be furnished the SRC.
