

October 13, 1964

Present: All commissioners, Mr. W. S. Donaldson, Mr. Oliver Guyther.

Press Release from Assessment Office

The commissioners reviewed a release issued by the State Office of Assessments and agreed that same could be released to county papers by Mr. Herbert.

Library

Mrs. Polly Barber reported that as population has increased in the county, and the budget is based on these figures, the current budget is now \$726.00 short. Instead of the \$16,746.00 which was originally the county share, they must now have \$17,522.00. The state share was originally \$34,474.00, and is now \$36,910.00, an increase of \$2,456.00. In order for the county to get this increase, it must furnish the \$726.00. The figures for the population come from the Division of Library Extension of the Board of Education. Mrs. Barber said they must have this money immediately.

The commissioners agreed to grant this request and Mrs. Barber will find out what she must do to expedite this matter so far as the state is concerned. She will be meeting with state officials tomorrow.

Library Road

Concerning relocation of this road in a manner to give the library more property, Mr. Guyther advised that the commissioners could give them a reverter deed stating that the library could use this as long as it is used solely for library purposes. If not, it would revert back to the commissioners.

Mr. Williams will be contacted and told that the commissioners would like to keep work on this road at a minimum, that is, grading, graveling, and paving, and omitting gutters and curbs. He will also be informed that the commissioners do not want the old road scarified and seeded.

School Bus Extension - Paul Bell

The commissioners discussed transportation for Woodburn boy who lives on the Fresh Pond Neck Road. This would be to return the boy to his home in the afternoon, only. The commissioners agreed to this arrangement. The bus driver in question is Mr. Babcock.

Meeting adjourned.

Approved,

  
F. Elliott Burch  
President
